## SUMMARY

Results-driven Software Engineer with **3+** years of experience developing scalable **full-stack** applications using **Node.js, React, Next.js, TypeScript, Java, Spring Boot**, and **SQL/NoSQL** databases, with expertise in **Azure DevOps, AWS**, and **CI/CD** pipelines for efficient software delivery. **Expertise extends** beyond full-stack development to include hands-on experience in **DevSecOps, Data Engineering, and Distributed Systems**, gained through personal projects and **system-building** efforts in academic projects. Driven by a passion for **continuous learning**, with a keen interest in **exploring Large Language Models (AI), distributed systems, application security, and software delivery**.

## TECHNICAL SKILLS & CERTIFICATIONS

**Languages:** Go, Java, Python, C/C++, SQL, JavaScript, HTML/CSS, TypeScript, Bash

**Tools & Frameworks:** Next.js, React.js, Tailwind CSS, Figma, Flask, Spring Boot, Spring MVC, Django, REST APIs, Postman, Playwright, Stripe, VS Code, PyCharm, IntelliJ, GoLand.

**Databases & Data Engineering:** MySQL, Supabase, MongoDB, Postgres, Spring Data JPA, Drizzle ORM, Apache Kafka, Apache Pinot, Airflow, Apache Superset, Hadoop, PySpark.

**Cloud & DevOps:** AWS, Azure, OCI, Vercel, Docker, Kubernetes, Helm, Terraform, Jenkins, GitHub Actions, Argo CD, Azure DevOps, Git, Linux.

**AI & ML:** Langchain, AstraDB, Langsmith, Redis (Upstash), Gemini AI, Pandas, NumPy, Matplotlib, ScikitLearn.

**Cloud Certifications:** AWS Developer Associate, Microsoft Azure Certified Data Scientist Associate (DP-100), OCI Certified Gen Ai Professional, OCI Certified Ai Foundations Associate

## EXPERIENCE

### Full Stack Developer

June 2024 – Aug. 2024

*Hive-Unified Collegiate Platform*

*Buffalo, NY*

- Developed a scalable unified college platform using **Next.js, React**, and **TypeScript** for student onboarding, interactive daily polls, and dashboards, improving user engagement by **30%**.
- Integrated **Drizzle ORM** with **Supabase** for scalable database management, reducing query execution time by **40%** and **NextAuth** (JWT) for secure authentication, decreasing unauthorized access attempts by **60%**.
- Automated email notifications using **SendGrid** for seamless customer-investor communication, reducing email failures by **25%**, and implemented **Jest** for robust unit testing, improving application reliability by **40%**.

### Full Stack Developer

Jan. 2024 – May 2024

*OneDataShare | IBM*

*Buffalo, NY*

- Contributed to a research project by developing a scalable microservices backend with **Spring Boot** and a high-performance frontend using **React** and **TypeScript**, improving efficiency by **50%**.
- Developed and optimized microservices using **Spring MVC, JPA, Spring Security, JWT authentication**, and **MongoDB**, enhancing application efficiency by **35%** and ensuring secure data processing.
- Integrated **Eureka** for service discovery and containerized microservices with **Docker**, improving deployment efficiency by **40%**, while leveraging **Log4j** for logging and **Lombok** to reduce boilerplate code by **50%**.
- Enhanced API reliability with **JUnit**, and **MockMVC** testing, increasing test coverage by **45%**, and documented services using **Swagger** for clear API communication, reducing onboarding time for new developers by **30%**.

### Software Developer

Sep. 2022 – July 2023

*Caterpillar PVT LTD*

*Chennai, India*

- Developed scalable internal tooling applications using **React, Next.js**, and **TypeScript**, enhancing UI performance and operational efficiency.
- Leveraged **React Query, Context API, custom hooks, Redux, React Hook Form**, and **Tailwind CSS** for state management, data fetching, and a seamless UI/UX experience.
- Utilized **TypeScript** for Backend **APIs** and designed **Figma-based UI/UX** components for improved accessibility while implementing **Playwright** automation scripts to ensure design consistency.
- Managed **Azure DevOps** pipelines and repositories, automating version control and reducing deployment failures by **30%**.

### Software Engineer

Feb. 2021 – Sep 2022

*Cognizant Technology Solutions | Client: CVS Pharmacy*

*Chennai, India*

- Developed and containerized a scalable application with a **React** and **TypeScript** frontend & a Java-based **Spring Boot** backend, leveraging Docker & GitHub Actions for CI/CD automation, reducing deployment time by 40%.
- Designed **OAuth2** authentication with Spring Security and **Keycloak** for secure access control, reducing authentication errors by **50%**.
- Configured **API Gateway**, **Redis**, and **RabbitMQ** for efficient service communication, decreasing latency by **35%**.
- Implemented **distributed locking** for scheduled cron jobs and **resilience patterns** (retry, circuit breaker, and fallback mechanisms) resulting in a **50%** improvement in both **consistency** and **availability**.
- Leveraging **AWS** services like **S3**, **RDS**, **DynamoDB**, **IAM**, **Load Balancer**, and **ECS/EKS** for efficient storage, robust security, seamless scalability, and streamlined DevOps.
- Implemented **Grafana**, **Prometheus**, **Tempo**, and **Loki** for centralized logging, and tracing, improving issue resolution speed by **60%**.
- Automated UI testing using **Selenium**, **Java**, and **TestNG**, reducing manual testing efforts by **45%**.
