SUMMARY

Results-driven Software Engineer with **3+** years of experience developing scalable **full-stack** applications using **Node.js, React, Next.js, Java, Spring Boot**, and **SQL/NoSQL** databases, with expertise in **Azure DevOps**, and **CI/CD** pipelines for efficient software delivery. **Expertise extends** beyond full-stack development to include hands-on experience in **DevSecOps, Data Engineering, and Distributed Systems**, gained through personal projects and **system-building** efforts in academic projects. Driven by a passion for **continuous learning**, with a keen interest in **exploring Large Language Models (AI), distributed systems, application security, and software delivery**.

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Go, Java, Python, C/C++, SQL, JavaScript, HTML/CSS, TypeScript, Bash

Tools & Frameworks: Next.js, React.js, Tailwind CSS, Figma, Flask, Spring Boot, Spring MVC, Django, REST APIs, Postman, Playwright, Stripe, VS Code, PyCharm, IntelliJ, GoLand.

Databases & Data Engineering: MySQL, Supabase, MongoDB, Postgres, Spring Data JPA, Drizzle ORM, Apache Kafka, Apache Pinot, Airflow, Apache Superset, Hadoop, PySpark.

Cloud & DevOps: AWS, Azure, OCI, Vercel, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Argo CD, Azure DevOps, Git, Linux.

AI & ML: Langchain, AstraDB, Langsmith, Redis (Upstash), Gemini AI, Pandas, NumPy, Matplotlib, TensorFlow, ScikitLearn, PyTorch.

Professional Skills: Strong Organization and Communication Skills, Creative Thinker, Flexible, Adaptable, Problem Solving, Can Do.

Cloud Certifications: AWS Developer Associate, Microsoft Azure Certified Data Scientist Associate (DP-100), OCI Certified Gen Ai Professional, OCI Certified Ai Foundations Associate

EXPERIENCE

Full Stack Developer Intern

June 2024 – Aug. 2024

Hive-Unified Collegiate Platform

Buffalo, NY

- Developed a unified college platform using **Next.js, React**, and **TypeScript** for student onboarding, interactive daily polls, and dashboards, improving user engagement by **30%**.
- Integrated **Drizzle ORM** with **Supabase** for scalable database management, reducing query execution time by **40%** and **NextAuth** (JWT) for secure authentication, decreasing unauthorized access attempts by **60%**.
- Automated email notifications using **SendGrid** for seamless customer-investor communication, reducing email failures by **25%**, and implemented **Jest** for robust unit testing, improving application reliability by **40%**.

Graduate Research Assistant

Jan. 2024 – May 2024

OneDataShare | IBM

Buffalo, NY

- Contributed to a research project developing a **Spring Boot**-based microservices backend and a **React** frontend, ensuring scalability and efficiency by **50%**.
- Developed and optimized microservices using **Spring MVC, JPA, Spring Security, JWT authentication**, and **MongoDB**, enhancing application efficiency by **35%** and ensuring secure data processing.
- Integrated **Eureka** for service discovery and containerized microservices with **Docker**, improving deployment efficiency by **40%**, while leveraging **Log4j** for logging and **Lombok** to reduce boilerplate code by **50%**.
- Enhanced API reliability with **JUnit**, and **MockMVC** testing, increasing test coverage by **45%**, and documented services using **Swagger** for clear API communication, reducing onboarding time for new developers by **30%**.

Software Developer

Sep. 2022 – July 2023

Caterpillar PVT LTD

Chennai, India

- Built responsive web applications using **React** and **Next.js** for internal tools, improving UI performance by **25%**.
- Developed **Playwright** test automation scripts for **25+** components using **TypeScript**, reducing manual QA efforts by **50%**.
- Designed **Figma**-based UI/UX components for better accessibility, decreasing navigation time by **20%**.
- Managed **Azure DevOps** pipelines and repositories, automating version control and reducing deployment failures by **30%**.

Software Engineer

Feb. 2021 – Sep 2022

Cognizant Technology Solutions | Client: CVS Pharmacy

Chennai, India

- Developed and containerized five microservices using **Docker** and **GitHub Actions** for **CI/CD** automation, cutting deployment time by **40%**.
- Designed **OAuth2** authentication with Spring Security and **Keycloak** for secure access control, reducing authentication errors by **50%**.
- Implemented **Grafana**, **Prometheus**, **Tempo**, and **Loki** for centralized logging, and tracing, improving issue resolution speed by **60%**.
- Configured **API Gateway**, **Redis**, and **RabbitMQ** for efficient service communication, decreasing latency by **35%**.
- Implemented **distributed locking** for scheduled cron jobs and **resilience patterns** (retry, circuit breaker, and fallback mechanisms) resulting in a **50%** improvement in both **consistency** and **availability**.
- Automated UI testing using **Selenium**, **Java**, and **TestNG**, reducing manual testing efforts by **45%**.

EDUCATION

University At Buffalo	Buffalo, NY
<i>Masters Of Science in Computer Science</i>	<i>3.5/4.0</i>

PROJECTS

TACO DB | *C++, Database Systems, Algorithms, Data Structures*

- Contributed to the development of a highly efficient DBMS by implementing POSIX-based file I/O, designed buffer management, and optimized data page structures for 40% efficient record storage and retrieval.
- Designed an iterator-based query processor to handle selection, projection, and aggregation, improving execution efficiency by 30% for single-table queries.
- Built a B-Tree index system to enhance data retrieval speed by 45%, supporting efficient search, insertion, and deletion operations
- Implemented Cartesian product, sort-merge join, and index nested-loop join to optimize multi-table query execution and improve database performance by 60%.

Advanced DevSecOps Pipeline | *Jenkins, AWS, Argo CD, Terraform*

- Designed and deployed a scalable Three-Tier architecture on AWS EKS, leveraging CI/CD pipelines to enhance deployment efficiency by 50%.
- Automated EKS infrastructure management using Terraform and Terraform LifeCycle, reducing manual provisioning efforts by 60% and improving deployment consistency.
- Developed a Jenkins pipeline for automated application deployment, integrating DevSecOps best practices with OWASP Dependency Check, Trivy, SonarQube, Docker, and ECR, reducing security vulnerabilities by 40%.
- Implemented a secure jump server for cluster access, configured Kubernetes networking and security with Ingress, Secrets, and Kyverno, and leveraged ArgoCD for GitOps-driven deployments, reducing deployment errors by 35%.
- Set up Prometheus and Grafana for real-time monitoring and integrated CAST AI for cost optimization, reducing cloud expenses by 30% while improving system observability.

Modern Text Chat Application | *C/C++, Networking Concepts, TCP & Sockets*

- Designed and implemented client-server components for reliable communication, leveraging the select() system call for efficient multi-socket handling in a single-threaded environment.
- Developed key user functionalities like login, message broadcasting, private messaging, and a centralized server for seamless interaction.
- Integrated a command-line interface with commands (LIST, IP, PORT, LOGIN, REFRESH, EXIT), message buffering for offline clients, client blocking/unblocking, and login tracking, enhancing user management and system robustness.
- Implemented three reliable transport protocols: ABT (stop-and-wait), GBN (sliding window with full retransmission on loss), and SR (selective retransmission of lost packets).

POSITIONS OF RESPONSIBILITY

General Secretary	Aug. 2020 – June 2021
<i>Rotaract Club of Sathyabama, Sathyabama University.</i>	<i>Chennai, India</i>
Professional Service Director	Aug. 2019 – June 2020
<i>Rotaract Club of Sathyabama, Sathyabama University.</i>	<i>Chennai, India</i>
Intern Team Lead	Feb. 2021 – May 2021
<i>Cognizant Technology Solutions</i>	<i>Chennai, India</i>
